# Bio Jason Hutchings

Channel Director, North Europe and Sub-Saharan Africa

- I received a Higher National Diploma (NTC5) in Electrical & Electronic Engineering from Witbank Technical College, South Africa.
- I began my career in Electrical Engineering in 1985 as a young apprentice Electronic Technician in Witbank, South Africa.
- In 1996 I chose a new career path within the field of Industrial/Process Automation, I have since worked for a number of leading Global Manufacturers of Industrial/Process Automation, namely Weidmuller, Omron, Rockwell Automation and now Schneider Electric in leadership roles across various industry segments.
- Currently I am driving the channel business across North Europe and Sub-Saharan Africa (NESSA) including leading the establishment of our PA business in South Africa
- I am based in “Rather wet Wales”.

# EcoStruxure™ Process Instrumentation

Jason Hutchings  
Gerrit Bruntink

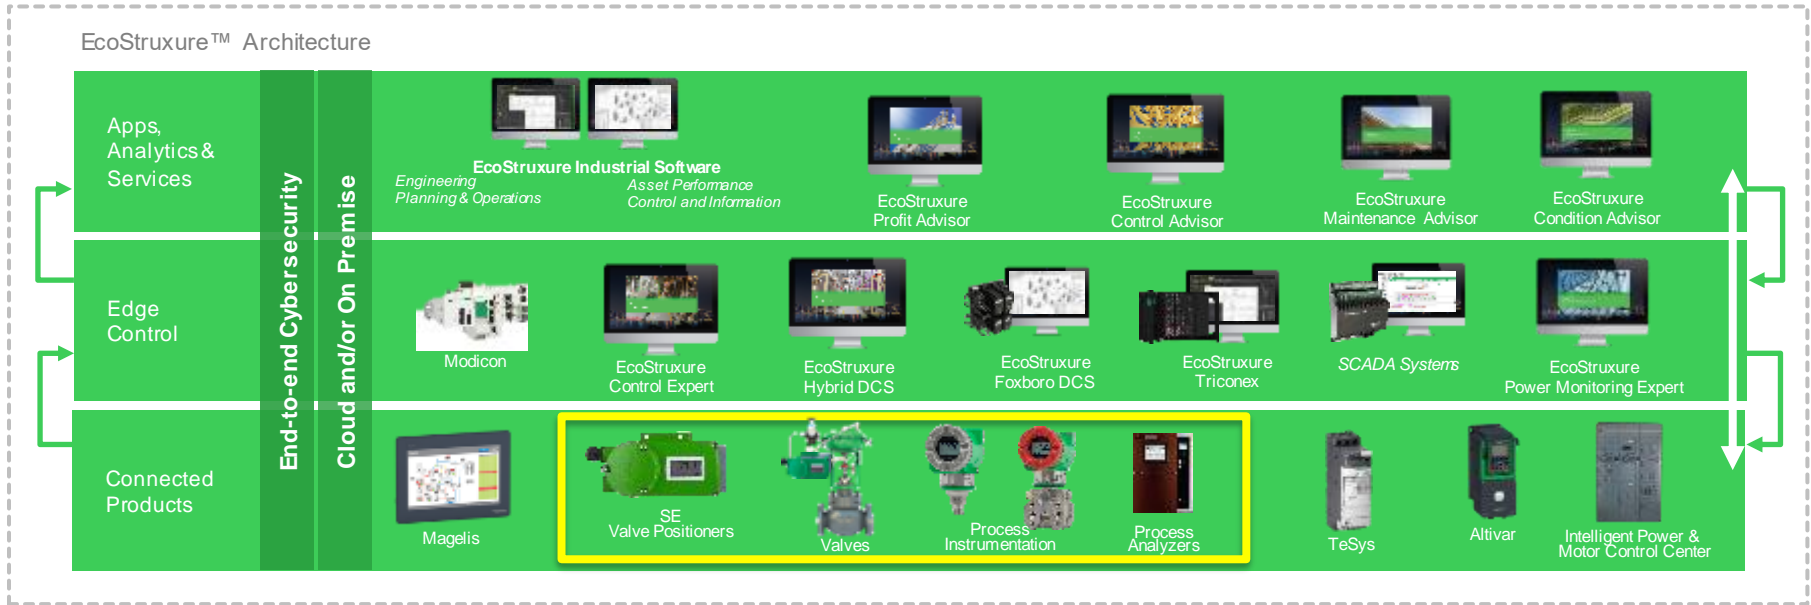

The image shows an industrial plant, likely a refinery or chemical processing facility, during the golden hour of late afternoon. Several tall, cylindrical distillation columns are visible, each with multiple horizontal bands and external ladders. A complex network of pipes, valves, and structural supports connects these units. In the foreground, a large horizontal cylindrical vessel is prominent on the left. The sky is a clear, deep blue, and the overall scene is bathed in the warm, orange light of the setting sun. A semi-transparent green banner is overlaid across the middle of the image, containing the title text.

# EcoStruxure and connected Process Instrumentation, Analysers & Valves

Let the data drive your process efficiency

Reliable and Accurate data are the 1<sup>st</sup> (and most important) step to Smart Industry. Inaccurate measurements (always) result in poor performance and inefficiency!

# Process Instrumentation (Foxboro), the story

- Became part of Schneider-Electric January 2014.
- Now part of the Industry Business division of SE.
- Global brand for ICSS and Process Instrumentation.
- Longest Heritage in the industry of >100 years.
- We work with;

*60% World's LNG  
producers*

*92% World's  
Petroleum  
Companies*

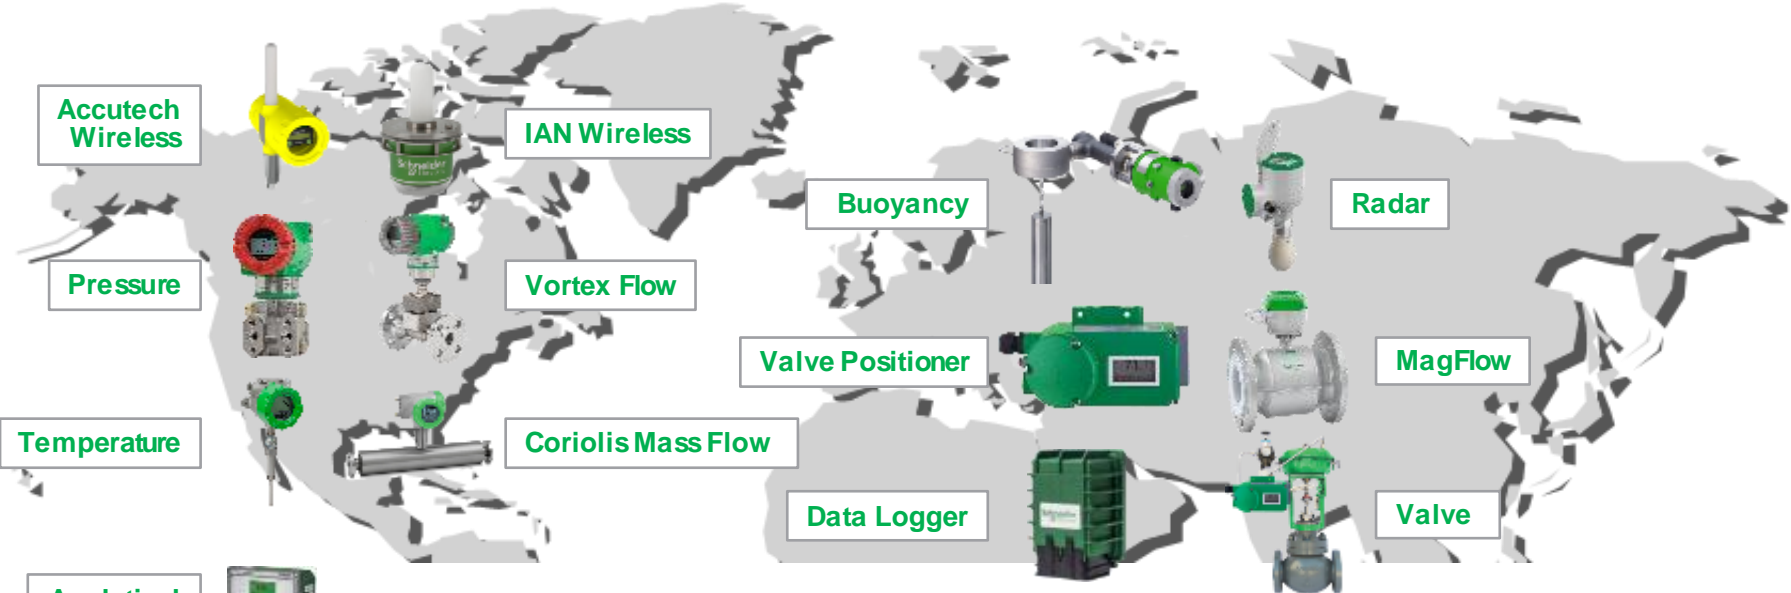

*92% World's  
Chemical  
Companies*

# SE Process Instrumentation a global supplier

With global manufacturing plants and delivery organizations

**SE Process Instrumentation** is a global supplier of instrumentation to the process industry. Lean manufacturing facilities incorporate measurement and control innovations to produce **State of the art instrumentation** for all process industry.

## Bio Gerrit Bruntink, SSE Director Wireless

- Gerrit Bruntink has received his Bachelor degree on Mechanical Engineering and later his master degree in Commercial Economics.
- Since 1990 I have had several jobs in the Instrumentation and Control industry, varying from, sales and channel management, general management and business development at E&H, Tyco, Metso and SE.
- Currently I am driving the wireless portfolio in EMEA and support the regional sales team to grow the wireless business.
- I am based in beautiful Netherlands

# Industrial Automation and Wireless Information Network Solutions

## Process Automation – Wireless Adopted:

- It has taken over a decade for wireless to emerge as a **default** requirement for pervasive monitoring.
- By 2017 more than **80%** of industrial operators had deployed Wireless Sensor Networks (WSN).

## Why Wireless:

- As many as **50%** of desired points are not monitored due to **cost** and **time** of implementation.
- IIoT technologies and **mindset** are changing expectations.
- Maintenance Advisors, Asset Advisors and other deep rooted **Facility Management Systems** are ready to embrace the data.

# Wireless Information Network Solutions

- Why **Schneider Electric** Wireless Information Network solutions?
- **Schneider Electric** Wireless Information Networks are not just Wireless Field Instruments;
  - *They are wireless information networks that can provide many process parameters and provide much more information to improve your business instead of just monitoring your process.*
- **Schneider Electric** Wireless Information Networks are not limited to just one technology
  - *BLE Bluetooth Low Energy + Wireless HART for short range, 2.4GHz for mid-range and 4G or satellite for long range. This gives always the right solution for every application*
- **Schneider Electric** is not just a Process Automation Provider, we are your IIOT partner

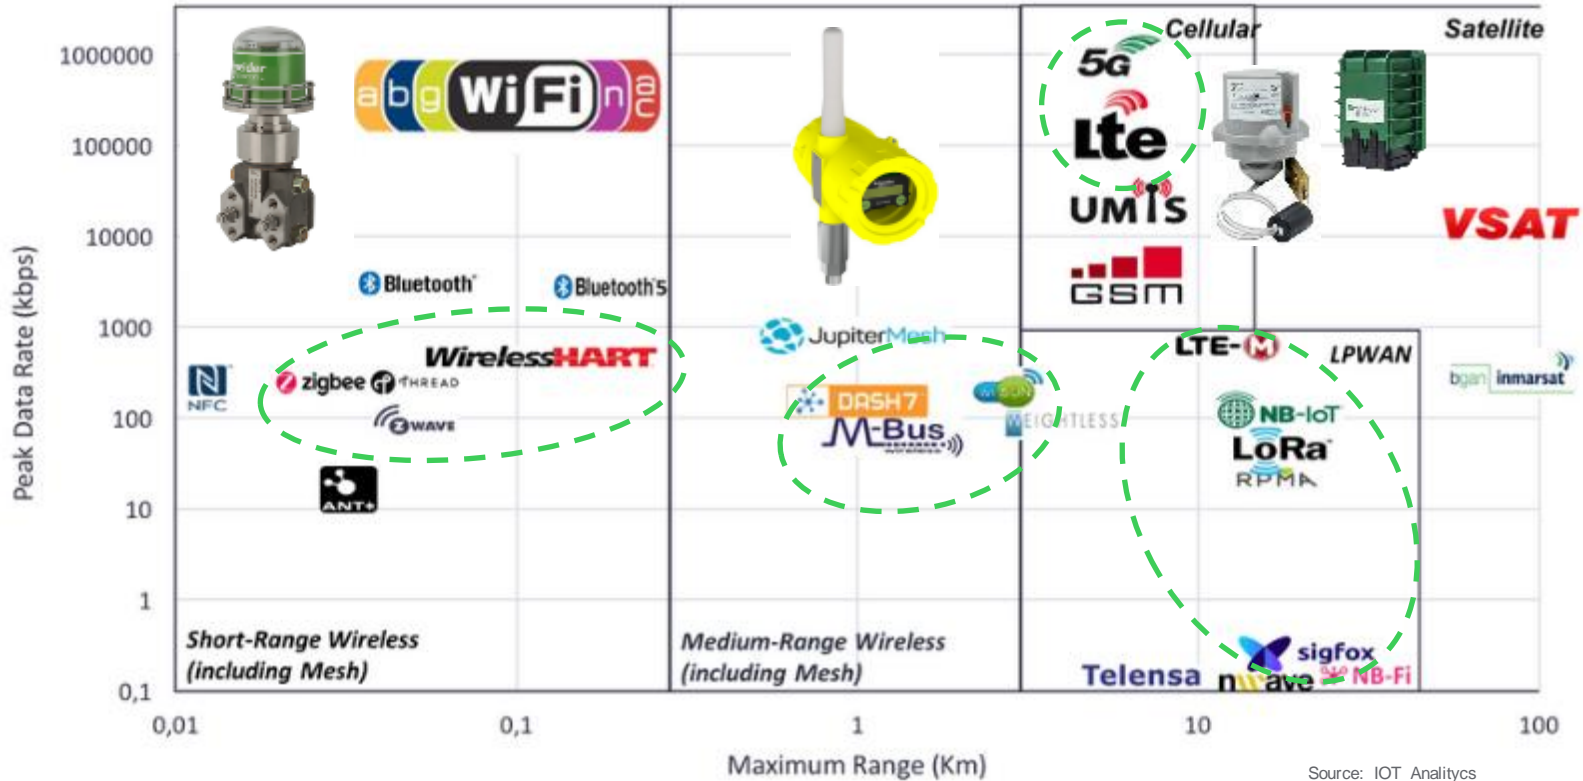

# Introduction

# Comparison Wireless Technologies

Peak Data Rate vs Maximum Range

Source: IOT Analytics

# Wireless Information Network Solutions

# Instrument Area Network - IAN

# Process Instrumentation Wireless HART Platform IAN

IAN Transmitters are managed through the **concentrator WiFi interface**, the Gateway or from the Host.

Longest battery life **over 10 years- Maintenance free!**

Simplest network to deploy **Only 2 clicks!**

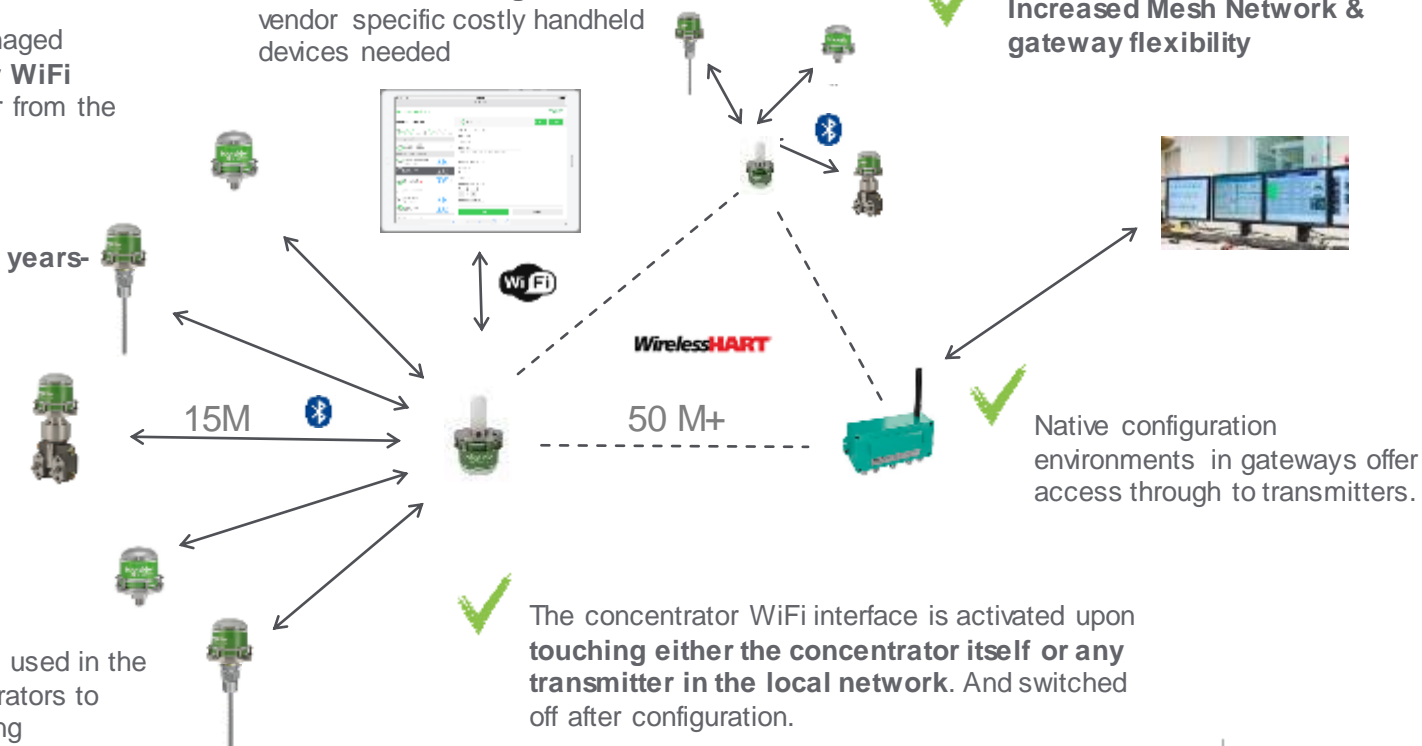

**Powerful LED lights** are used in the transmitters and concentrators to indicate connectivity during deployment.

**Web enabled configuration**, No vendor specific costly handheld devices needed

**Increased Mesh Network & gateway flexibility**

The concentrator WiFi interface is activated upon **touching either the concentrator itself or any transmitter in the local network**. And switched off after configuration.

# IAN Family

End Node  
EN

**WirelessHART<sup>®</sup>**

Central Concentrator  
CC

## Features

- Plant wide network capability
- 64 Gbit Flash memory – storage capabilities
- Foreign EN Bluetooth support – growth opportunity
- CC can handle 8 EN's
- Configurable / Readable via tablet
- NAM & ATEX Transmitters Certifications
- EN - Battery life is 10 years\*
- CC - Battery life is 5 years\*
- Pressure, DP, Temp (+ Non-Invasive)

\* Battery life based on reference conditions

# Process Instrumentation Wireless HART Platform IAN

New approach to wireless sensor networks

- **Extend Autonomy**

- Low power BT technology
- 10-year battery lifetime

- **Increase Flexibility**

- Hybrid network
- Wireless HART & BLE

- **Eliminate blind spots**

- Architecture optimizes radio paths

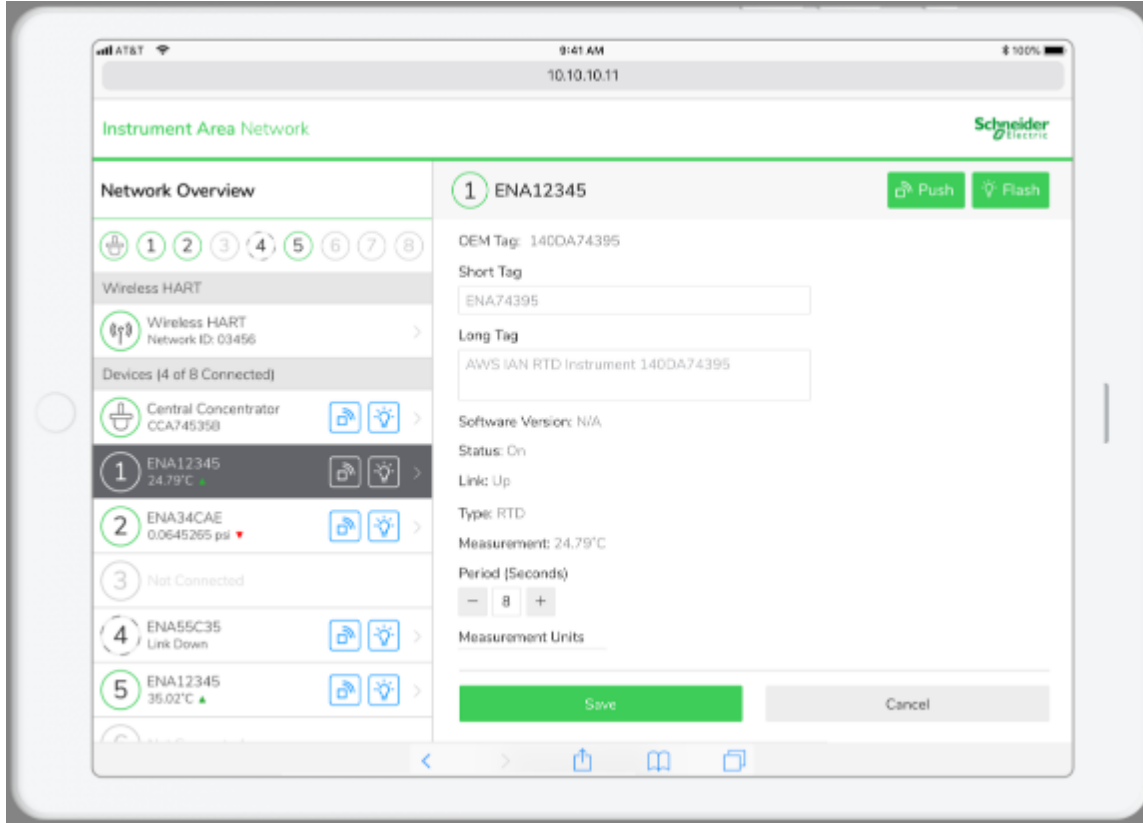

Foreign Nodes – Use Your Imagination

**Scalability:**

- Up to 8 transmitters per concentrator.
- Networks are scalable to hundreds of transmitters.

# Webpage HMI

- HMI IAN (Admin Node)
- Easy touch and feel
- For tablet, desk/laptop and smart phone
- No Expensive handheld needed

# Measurements for Plant Utilities, Used Case

## Challenge:

The customer needs to measure the steam temperature in remote parts of his plant. 15 measurements in different places. The current wired solutions available are too costly to deploy.

## Solution:

Use the IAN model WRT10 and a model WCC10 central concentrator. The IAN solution uses Bluetooth Low Energy to communicate to the central concentrator which communicates WirelessHART to a WirelessHART gateway connected to their PLC using Ethernet/IP.

## IAN Model Numbers:

- WRT10 + ECEPCO210002
- WCC10 and a P&F WirelessHART Gateway

## Markets:

- All Markets

# Your value from IAN

- Maintenance-, Asset- and other advisers are all hungry for process data. IAN is a perfect fit to make this data (information) available in a cost-effective way, in all markets.
- **IAN provides the lowest cost wireless solution without compromising performance.**
- **IAN is the simplest wireless network to deploy. (just 2 clicks and you're connected)**
- **IAN has the longest battery life. (maintenance free for over 10 years)**
- **IAN uses Smart Phone, Tablet or PC for configuration. (requires no costly handheld devices)**
- **IAN is full integrated in EcoStruxure**

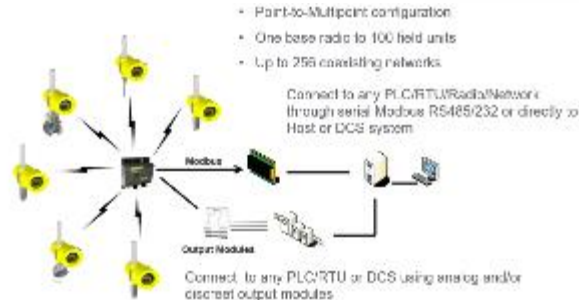

# Accutech

# Process Instrumentation long distance Wireless Platform

- Accutech Battery Powered Wireless Sensor Network
- Long distance 1000+ m
- Wi-Star communication Protocol
- Long life battery 5 years of operation
- 1 radio with 100 Field Sensors
- Wide range of Sensors
- License Free ISM bands 2.4 GHz
- License Free ISM bands 900 MHz
- -40 to + 85 °C
- CE, ATEX, IECEx -ia

# Worldwide Certifications

## Radio use: Licence free ISM bands:

2.40 GHz - 2.484GHz	Global (ETSI, FCC, countries as required)
902MHz - 928MHz	North America (FCC)
915MHz - 928MHz	Australia

## Environmental / Performance Certifications:

### Field Devices

NEMA4X aluminum enclosures.

Intrinsically safe, Class I Div1  
CE, ATEX/IECEX -ia (intrinsically safe)

### Base Radios

**BR10:**  
CSA Class 1, Div 1

**BR20:**  
CSA Class I Div 2.  
ATEX/IECEX-n (Zone 2)

# Basic Network Architecture

11-30VDC

This is the basic setup of an Accutech network up and running

Accutech Manager  
Instrument network configuration

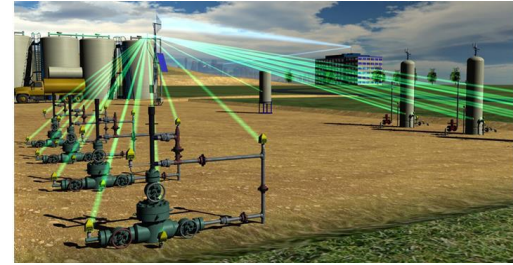

Life Is On | Schneider Electric

# Used Cases

- Wellhead monitoring
- Water pressure monitoring
- Storm water monitoring
- Etc

# Your value from Accutech

- *Accutech is the robust and proven technology in many upstream O&G applications.*
- *The solution collects measurement and operational data from devices spread across geographical – dispersed assets using low power with a long battery life of 5 years*
- *Accutech delivers the data over a wide area secured communication infra structure*
- *Data can be used for supervision, Analysis and business decision-making*
- *Accutech is fully integrated in EcoStuxure*

# 4G-LTE Datalogger

Connecting your process information to the cloud

Life Is On | Schneider Electric

Life Is On | Schneider Electric

# Datalogger Family

	PRemium	LiTe	Intrinsic Safe
Analogue inputs	4	2	3
Digital inputs*	5	2	3
Serial Inputs RS485, RS232, SDI-12, Modbus and ASCII protocols supported	16	16	16
No of SIM cards	2	1	2
GPS	Yes	No	Yes
Atex certified	No	No	
Ingress protection IP68 / NEMA 6P	Yes	Yes	Yes
Alarm notification per SMS, email	Yes	Yes	Yes
Communication (4G/3G/2G), Bluetooth connectivity	Yes	Yes	Yes
Communication through NB-IOT end of Q2	No		No
In-Cloud or On-Premise solution	Yes	Yes	Yes
Battery (5+ years)	Yes	Yes	Yes
Available for Sales	<b>YES</b>	<b>YES</b>	<b>Q3</b>

\* 2 x DI can be programmed as DO

# Data Hub, User Interface

- The Data Hub is a secure method of visualizing the data provided by the datalogger. There is a secure login and access portal to access the data, status and configuration from the datalogger, or group of dataloggers.

# Datalogger Architectures

- Different Architectures possible

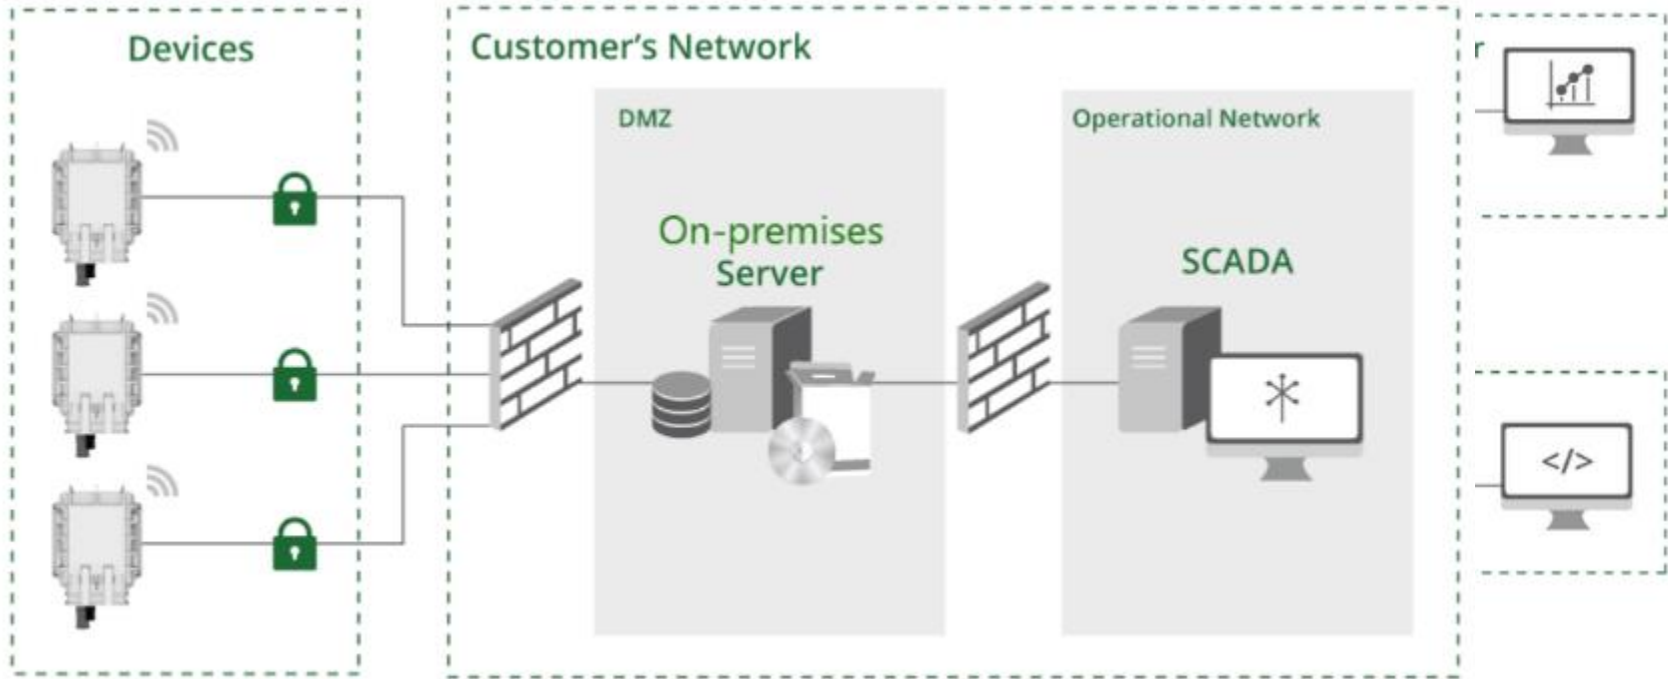

Figure 2: On-premises server

# Datalogger Cloud and On-Premise Solutions

- The datalogger has the highest level of cyber security with TLS 1.2 and a 256-bit AES encryption
- The most flexible solution within our portfolio for Remote data acquisition and simple control
  - (Can work as a remote RTU for eg pump controlling (on/off), valve control (open close) etc)
- Data can be stored in the Cloud or On-Premise through CSV, DNP-3 or OPC UA\*
- Different data packages available for Cloud solution
- Different support packages available for On-Premise solution
- Bluetooth connection to App
- Great integration within EcoStruxure
- \*OPC-UA available from July 2021

# What do you get in Datalogger box

- Comes standard with External Antenna, mounting bracket, mounting materials and sensor connectors

- Accessories (Solar panel etc) and Level sensors will be added to portfolio in Buy Automation
- PR + LT version Available, IS version becomes available in Q3

# Centeron tank monitoring

# Centeron

## 4G Products

- Schneider Electric Centeron is wireless solution for tank level monitoring, asset tracking and data provision
- **Primary markets** (wholesale) suppliers of fuels, lubricants, LP Gas, liquid fertilizers and chemicals using above ground storage tanks.
- 5G and Satellite solutions available

Guided wave Radar

Hydrostatic Pressure

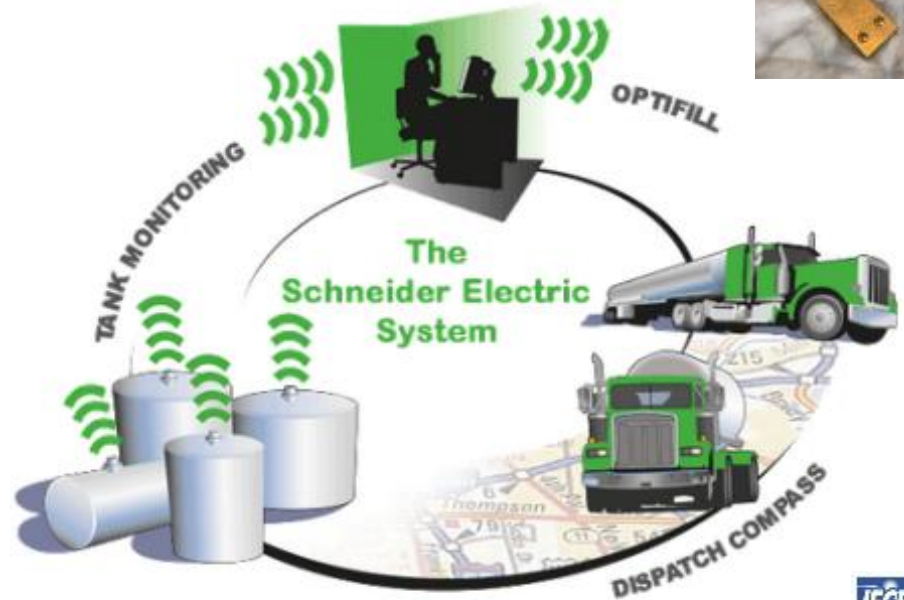

Float pickup

# Centeron LevelTrack

## GPS & Satellite Products

- Centeron LevelTrack allows level management and **global** asset tracking using BLE (Bluetooth Low Energy), **GPS**, and a **simplex satellite modem**
- Battery-operated, with an expected battery life of greater than three years under normal operating conditions
- Compatible with Centeron WebView for customized reports and monitoring

Life Is On

# Centeron WebView

Secure Web-based inventory and delivery management solution

- Provides you with up-to-date inventory statuses that support optimal delivery decisions
- Easily review current and historical tank level information
- Track your progress towards achieving more efficient operations
- Alerts help you eliminate costly run out situations

Life Is On

**Schneider**  
Electric
