TAKING THE LEAD

IEK on shaping solutions for Kenya's infrastructure and industrial future

BRIEFS

KENYA REVENUE AUTHORITY DECRIES POOR INFRASTRUCTURE AT MALABA ONE-STOP BORDER POINT

8:06:29

IEK President Eng. Shammah Kiteme Speaks on KBC's Good Morning Kenya Wednesday, 8th October 2025

The President of the Institution of Engineers of Kenya (IEK), Eng. Shammah Kiteme, was hosted on Good Morning Kenya on KBC - where he passionately highlighted the critical role engineers play in shaping Kenya's future.

Eng. Kiteme underscored that engineers are at the heart of every major development effort from roads and aviation to water, sanitation, and the blue economy.

As Kenya approaches its centenary in about four decades, Eng. Kiteme challenged the nation to think long-term and pursue sustainable industrialization.

"Kenya needs long-term planning. In the next 38 years, we will mark 100 years as a nation. The question is: will we still be struggling, or will we have built a country we can be proud of? Sustainable industrialization is essential strengthening local manufacturing and being intentional in our policymaking is critical," he emphasized.

Highlighting the potential for cross-border collaboration, Eng. Kiteme pointed to the COMESA and African Continental Free Trade Area (AfCFTA) frameworks as valuable avenues for expanding opportunities for engineers across Africa.

"We need to create employment opportunities for engineers across Africa. COMESA provides a great platform, a Kenyan engineer can work in Rwanda or any other member state. We must leverage these agreements to develop cross-border infrastructure and promote intra-African trade," he said.

IEK Pays Courtesy Call to the Engineers Board of Kenya (EBK)

Tuesday, 7th October 2025

The Institution of Engineers of Kenya (IEK) paid a courtesy call to the Engineers Board of Kenya (EBK). The visit underscored the - importance of continued collaboration between professional bodies in advancing the engineering agenda in Kenya through compliance, professional development, and sectoral growth.

The visit, led by Eng. Maureen Auka, Chief Executive Officer (CEO) of IEK, and Mr. Joseph Alot, Manager for Policy, Research and Partnerships (PRP), was warmly received by Eng. Margaret Ogai, Registrar and CEO of the Engineers Board of Kenya (EBK).

Discussions focused on areas of mutual interest, including alignment of professional development -

initiatives, reinforcing compliance with regulatory standards, and enhancing collaboration between IEK and EBK to promote the growth of the engineering ecosystem in Kenya.

Eng. Ogai highlighted EBK's remarkable progress in ensuring quality assurance in engineering education across the country.

Eng. Ogai noted that through collaboration with the Commission for University Education and the Council of Engineering Deans and Principals, EBK has increased accredited engineering programmes from 30 in 2019 to 75 out of 78 in 2025, with full recognition targeted by the end of the year.

ESA FOOTBALL TOURNAMENT FINALS

FULL TIME

5 th YEAR	2
2 nd YEAR	1

IEK North Rift Branch Sponsors UoE-ESA Finals

Wednesday, 8th October 2025.

The Institution of Engineers of Kenya (IEK) North Rift Branch was proud to sponsor the recent University of Eldoret (UoE) ESA Finals.

The finals were a thrilling showcase of talent, teamwork, and determination. In a tight and tense football match, the 5th Year Engineering Students edged out the 2nd Year Students 2-1, keeping fans on the edge of their seats until the final whistle.

Through this sponsorship, IEK North Rift Branch reaffirmed its commitment to nurturing the next generation of engineers not only academically but also through co-curricular activities that build -

character, leadership, and resilience. We are honored to support such initiatives and celebrate the achievements of young engineers, helping to create a foundation for their future success.

Celebrating Customer Service Week: Appreciating Our Members

Monday, 6th October - 9th October 2025

As part of Customer Service Week, the Institution of Engineers of Kenya (IEK) took a moment to recognize and celebrate the - spirit of our valued members. In line with this year's theme, "Mission: Possible," IEK expressed appreciation to Mr. Timothy Ongino Oluchiri, who was the first member to visit the IEK offices at Top Plaza during the week.

Mr. Oluchiri received a token of appreciation from the Secretariat in recognition of his continued support and engagement with the Institution.

Octagon Kenya Celebrates Customer Service Week with IEK

Friday, 3rd October 2025

In the spirit of Customer Service Week 2025, Octagon Kenya joined the Institution of Engineers of Kenya (IEK) in celebrating the vital role of - exceptional service delivery by gifting a beautifully decorated cake to the Institution.

The gesture reflected Octagon Kenya's appreciation of IEK's unwavering commitment to serving its members with professionalism, efficiency, and care values that align closely with this year's Customer Service Week theme, "Mission: Possible."

The event served as a reminder of the value of teamwork, collaboration, and dedication to continuous improvement in delivering quality service to members.

The Engineers' Corner

Eng. Nduma Ruwah -Electrical Engineer, Nuclear Energy Infrastructure Development Engineer, NUPEA.

1. What inspired you to pursue electrical engineering, and how did you find your way into the nuclear energy space?

Well, I wasn't a career path guru nor was I a greenhorn before I undertook the program. At the time I was toying with the idea of studying architecture. Fortunately, I had a friend whose cousin was an architect, she set us up and he set me firmly on my path.

I got into the nuclear energy space totally by chance, I had not fixed my mind on venturing into it. At the time, the Fukushima Daiichi nuclear event had occurred (March 2011) and anyone who wasn't living under a rock was given an "Introduction to nuclear energy for dummies" by the experts through the various media channels. So, the Fukushima nuclear event essentially introduced me to nuclear energy.

2. If you weren't an engineer, what career path would have been your second choice?

Electrical engineering was my first option and I was fortunate enough to get an admission into the program. BSc. Economics was my second option, and I presume that would've been my career path.

3. If you could go back to university, what's one non-engineering subject you'd love to study just for fun?

History (Is there such a program?). I think it's the best subject I'd take outside of Engineering.

4. From an electrical engineer's perspective, what makes nuclear energy an important part of Kenya's future energy mix?

High availability factor. With nuclear, what you see is what you get. If you install a 300MW plant, you'll get the 300MW for approximately 90% of the time. Hence its utilisation as a base load generation technology. This also makes it more suitable for use as a source of power for aircraft carriers and submarines.

5. What was the biggest surprise you encountered in your early years as a young engineer entering the workforce?

Bureaucracy. I never expected it to be such a behemoth.

6. Are there emerging technologies in the electrical or nuclear field that you find particularly exciting?

Miniaturization of electronics through the use of nano technology. This has led to the development of smaller, faster and more energy efficient electronics. In the nuclear energy space, the development of advanced reactors which have the ability to operate under very high temperatures and have enhanced and more passive safety systems/features. Also, the development of SMR's which are designed to be deployed a lot faster, at low cost and for hybrid and non-electricity applications (cogen) e.g. for desalination and district heating.

7. What technical training or certification has most boosted your skills?

Most skills that I utilize today were self taught. The best skill I have is the ability to learn. This was acquired/built through interactions with the best minds throughout my academic life. Your company shapes you.

8. What's one myth about nuclear power that you wish people would stop believing?

That nuclear power is very dangerous.

The Engineers' Corner

Eng. Nduma Ruwah -Electrical Engineer, Nuclear Energy Infrastructure Development Engineer, NUPEA.

Death rates per unit of electricity production

Death rates are measured based on deaths from accidents and air pollution per terawatt-hour¹ of electricity.

Our World in Data

Data source: Markandya & Wilkinson (2007); Sovacool et al. (2016); UNSCEAR (2008; & 2018) OurWorldinData.org/energy | CC BY

1. Watt-hour A watt-hour is the energy one watt of power delivers for one hour. Since one watt equals one joule per second, a watt-hour equals 3600 joules of energy.
Metric prefixes are used for multiples of the unit, usually:
• kilowatt-hours (kWh), or a thousand watt-hours;
• Megawatt-hours (MWh), or a million watt-hours;
• Gigawatt-hours (GWh), or a billion watt-hours;
• Terawatt-hours (TWh), or a trillion watt-hours.

14. If one day you were asked to summarize your engineering journey in one word/ phrase, what would it be?

Exciting.

9. What's a fun fact about you that even your colleagues might be surprised to know?

I'm lively and love jesting.

10. If you had a superpower to make your work easier (or life more fun), what would it be?

Ability to fly without any aid. I see birds fly and wish I could too.

11. What advice would you give to young engineers aspiring to join the nuclear or power sector?

Always remember that your mind is like an umbrella- it works well when open.

12. If you were commissioned to design a monument for Kenya at 100 years, what would it be, and which county would you have it placed in?

The Thinker. Thinking is a critical step in problem solving.

I would station it in Kwale County since that's where I come from and would want to motivate them to think of homegrown solutions to the challenges we face.

13. If you could instantly learn a new skill (non-engineering), what would it be?

Wood working. I don't know why wood working, I just find it fascinating.

PUBLIC PRIVATE PARTNERSHIP FOR CRITICAL INFRASTRUCTURE PROJECTS TRAINING

27th-31st Oct, 2025 | Lake Naivasha Resort

Why Register

1. **Gain Expertise in PPPs:** Learn from industry leaders about structuring and managing successful Public Private Partnership projects.
2. **Understand Legal Frameworks:** Stay updated on the latest legal and regulatory considerations in PPPs.
3. **Discover Best Practices:** Explore case studies of PPP projects and understand strategies for effective implementation.
4. **Expand Your Network**
5. **Earn Continuous Professional Development Points (CPDs).**

Target Audience:
Engineers, Architects, Urban Planners, Project Managers, Government Officials, Investors, Financial Analysts, Legal Professionals, and other stakeholders involved in infrastructure development and the built environment.

CHARGES:
Members - Ksh 75,000
Non-members - Ksh 80,000

*Be visible, grow your Brand **Advertise with Us!***

The Engineering in Kenya Magazine is published by the Institution of Engineers of Kenya (IEK). The magazine has a wide audience amongst Engineering professionals and beyond, including stakeholders and policy makers both in public and private corporate entities.

Advertising with us will bring you to the attention of these stakeholders and give you the opportunity to grow your market. Our print run is 3,000 hardcopies and over 229,000 in digital circulation, bimonthly.

Get noticed in our next edition. Reach out to the IEK secretariat on 020 2729326; 020 2716922 or via email to: editor@iekenya.org

Yours faithfully,

Eng. Jacton Mwembe, PE, MIEK

Honorary Secretary

The Institution of Engineers of Kenya
