My Vision

Establishment of the School of Engineering in partnership with Key Stakeholders – EBK for 100% seamless transition of Graduate Engineers to Professional Engineers to build local Engineering Capacity for Sustainable Growth and service to Kenyans.

My Purpose

- **Anchoring Transformational Leadership:** Establish robust secretariat in line with IEK Strategic plan by filling various roles for departmental heads for promotion of Advocacy and Publicity activities by the institution as well as entrench organizational policies for good Corporate Governance.
- **Growth of membership:** 100% transition of Graduates to Professional Engineers through establishment of School of Engineering in partnership with Key stakeholders and promote online mentorship programs for Continuous Professional Development.
- **Welfare:** Advocate for good remuneration of engineers and the enforcement of the scale of fees for as well as lobby for tax incentives for investors who train engineers in their firms.
- **Engineering Affirmative Action Bill:** lobby for the EAA bill to ensure all state corporations that deal with infrastructure development as a primary function have over 80% drawn from the Engineering Fraternity to create opportunity for Engineers to serve in National development by law.
- **Local Content Promotion:** Lobby for the publishing of all infrastructure projects contract for opportunities for engineers in compliance to the 30 % local content law.
- **Engineering in County Government:** Lobby to ensure that all infrastructure, energy related dockets within county governments are led by Professional Engineers.
- **Mentorship of Graduate Engineers:** Lobby for training levy to provide for the mentorship and training of engineers in organizations, as well as tax incentives for developers who employ professional engineering services by PE's thus creating job opportunities for engineers

My Story & Achievements

- **Professional Mechanical Engineer**, Fellow IEK (F3963), Member CI Arb)
