

## **BIO DATA**

**Eng. Okova Wangaki Derek (M.4494), MIEK, PE. MSc. Civil Eng. UON, BSc. Civil Eng. JKUAT**

### **Ordinary Council Member for IEK 2020-2022**

**I plan to actively engage in pushing for matters and policies affecting Engineers and Engineering.** Enforcement of existing policies is Key since its fundamental in realizing our objectives in the Engineering fraternity.

**Engineers Welfare** by setting a minimum pay for all Engineers in Private and Public sector through working on legislation enactment. Counties need to be engaged to ensure anything technical is managed by Engineers to avoid compromise of quality and endangering of lives.

**Once elected we will work towards having all government technical institutions having at least two Engineering representatives at the board level.** The said reps should be subject matter experts on the core business of the said organization.

**There is also the need to work closely with Universities** to ensure the syllabus and the Engineering Courses are up to standard by ensuring good curriculum. This will end victimization of young Engineers who underwent courses not properly regulated hence denying them registration.

IEK Should ensure internships for students and graduates etc. Finally, is **Push for better job groups for Engineers in government institutions.**
