

## ENG. EMELDA ODHIAMBO- BIO DATA

FELLOW NO. F3379

CURRENTLY 2<sup>nd</sup> VICE PRESIDENT

Eng. Emelda is an energetic, self-driven Electrical Engineer with over 3 decades of experience on strategic, operational and planning both local and at cross border level in the Energy sector. She is currently the Contract Project Manager, in charge of Last Mile, AfDB II at the Kenya Power & Lighting Company.

### Vision

To enhance growth in the engineering profession and lead to acquire World class visibility.

### WHY ME?

- CONTINUITY:-I have been participated actively in the own initiatives to transform IEK, is a Team player with all and sundry, regardless of age, tribe and religion. I want to continue with what is already started by having more attractive IEK functions with good learnings and good attendance
- Eng. Emelda, is also strong in decision making. I am an adept strategist with exceptional ability to solve complex leadership, business and social challenges?
- Growth of Membership:-I have a proven record of leadership skills which includes servant leadership, motivation of professionals. As an electrical panellist, I will encourage the transition of membership from GE to PE through constructive interviews.
- Diversity Champion:-As a leader with effective communication and leadership skills for all age groups and gender, I championed the Women engineers' programs through mentorship and mentorship workshops for the year 2015-2017. This resulted in the achievement of the main objective of the Women wing of IEK, which was of increasing the numerical strength of women and increasing the visibility of participation in the engineering profession. The women engineers have held 2 world women engineers summits under my leadership.

- Capacity Building: - I have been the chairperson of the Capacity Building and Mentorship in IEK during the year 2018 /20 Committee. This proved to be the best committee over 1000 members were mentored and trained.
