

Mechanical Engineer from University of Nairobi, an MBA from USIU-Africa and an MSc. Energy Management. He is a licensed energy auditor, licensed solar professional with EPRA-Kenya. Among these he's also a Certified Energy Manager, Certified Measurement and Verification Professional, Certified Water Efficiency Professional all by AEE and a Project Management Professional by PMI. With a wide experience in the Construction and energy industry, has been involved in the push for Energy efficiency in East Africa with the East African Association of Energy Professionals. He has previously served as the head of Education and Capacity building committee at Kenya Green Building society. He has also served in the Mentorship committee under IEK 2018-2020

My focus areas - Leadership with Alacrity

- **Digitalise services** (i.e. IEK App, Paperless licences and certificates), revamp **membership programs** and Amplify **participation** of members
- **Engineers Welfare** -Ensure all engineers from GEs, PEs, to CEs benefit from internships, on-job training, Contracts and consultancy in tandem with the Infrastructure pillar of the Current National Government by engaging the private sector and all the relevant government run institutions
- Strategically strengthen **collaboration and partnerships** with other institutions both locally, regionally and internationally to provide opportunities for members.

As the stars have guided generations before us, **Let Us Look into A brighter future.**
