Solicited their points of interest, which I hope to present to the IEK Council. ▪ Successful 30 years active engineering practice without any adverse engagements or faulty designs reported to IEK, with clients such as national governments, private Clients, UNHABITAT, UNHCR, UNMISS, IOM, World Vision International, CARE International, universities, etc.
<p>Other associations and Capacity</p>	
<p>What would you like us to know about you?</p>	<p>My active engagement is the construction industry for 30 years, coupled with my active participation in the activities of the IEK has equipped me with an understanding of the issues that affect us as engineers. I feel I have a shared agenda to serve in the IEK Council where I hope to work with others to make our corporate engagement as engineers more fruitful and mutually satisfying.</p> <p>My Agenda is driven on pillars:</p> <ol style="list-style-type: none"> 1. <u>Continuity</u>: We will need to progress along the lines of successful established by the outgoing Council, as we merge new ideas into action plans. Nurture our relationship with WFEO; implement progressive protocols signed with partner professional groups, ie MRAs with Engineers Registration Board of Uganda, and others; Work to sustain our good working relation with government agencies, ie KRB, KeNHA, NUPEA, KPLC, etc; Continue the pro-reform agenda in matters of registration of Graduate engineers, etc. 2. <u>Relevant Visibility</u>: As engineers, we will need to raise our visibility as professionals, and get our opinion on matters of national and international importance. We shall establish competent forums of engagement with the media, to advance this agenda. 3. <u>Mentorship</u>: Cognizant of the low rate of professional transition from GE to PE, we shall put in place initiatives that are attractive and affordable to graduate engineers to encourage the them to take the professional interview. We shall lobby for the full implementation of the GEIP (program) at the earliest possible date.

|--|--|
| | <p>4. <u>Digitization</u>: We realize that part of the failure to serve the engineering fraternity efficiently is due to poor record keeping, difficult retrieval and fast service. We shall embrace 21st Century practices in record keeping, processing, retrieval etc as we embrace real-time customer engagements for faster service delivery.</p> |
