## Ordinary Member

### Why am I running and what change I want to bring

I have served IEK as Ordinary member in 2015/16 year. I chaired the Young Engineers Chapter.

I continue to mentor young engineers in my personal and public capacity in the Public sector, Public universities and schools.

### What is in it for you who make up the institution

As your representative in the Council, I will continue to bring a fresh perspective and connect the wisdom and experience of members within our institution to the young impressionable youth.

### My Story

When I was in Standard 4, I wrote a composition on what I would like to be when I grow up. Even at 9 years old,

I am a 3<sup>rd</sup> generation public servant and enjoy my work as one of few expert Transformer and Transmission Line engineers in the country. I currently work in Capacity Building fostering training and mentorship of our technical staff in KPLC.

I am an aspiring author with a 'hidden' dream of being a storyteller in my latter days.

### My Values

I value doing the right things, in the right way, for the right purpose and guide my mentees and colleagues. I supervise as such.
