IEK Participates in the 12th UNESCO Africa Engineering Week and 10th African Engineering Conference

Tuesday, 15th September, 2026

The Institution of Engineers of Kenya (IEK) demonstrated its active role on the continental stage by participating in the 12th UNESCO Africa Engineering Week and the 10th African Engineering Conference, held in Dar es Salaam, Tanzania from 13th to 17th September.

Led by the IEK President Eng. Harrison Keter, a delegation of Council Members and distinguished Kenyan engineers joined delegates from across Africa to discuss pressing infrastructure challenges under the conference theme, "Engineering Africa's Inclusive, Innovative and Sustainable Future".

The high-level gathering provided a vital platform for knowledge exchange, policy dialogue, and technical benchmarking among regional engineering bodies. Through these strategic engagements, IEK remains dedicated to positioning Kenyan engineering expertise at the forefront of shaping a sustainable and prosperous future for Africa.

IEK Delegation on a 10-Day Experiential Study Tour to Malaysia and Singapore

Tuesday, 15th September, 2026

A delegation of 20 Kenyan engineers travelled to Singapore and Malaysia on a 10-day industrial tour, organized by the Institution of Engineers of Kenya (IEK). Marked as the inaugural study tour to South East Asia, the mission provided participants with first-hand exposure to international engineering standards and sustainable technology models.

Led by IEK 2nd Vice President Eng. Otieno Ogallo—who represented IEK President Eng. Harrison Keter—the delegation engaged in discussions aimed at fostering IEK's global partnerships and expanding technical knowledge transfer.

During the Malaysian leg of the journey, the delegation paid a courtesy call to the Kenyan High Commission in Malaysia. Proceeding to Singapore, the group visited the Institution of Engineers Singapore (IES) Headquarters. They were warmly received by IES President Mr. Mervyn Sirisena and Honorary Secretary Mr. Danny Lee. Central to their discussions was strengthening institutional ties between IEK and IES, with a strong focus on capacity building, professional development, and adoption of emerging technologies.

Beyond formal engagements, the experiential tour allowed the Kenyan delegation to examine South East Asia's advanced smart city frameworks, sustainable transportation networks, and green building systems up close. By benchmarking these solutions against local challenges, the engineers returned with actionable insights to drive innovation, improve project execution, and elevate professional standards across Kenya's rapidly expanding infrastructure ecosystem.

This landmark visit serves as the template for future international study visits designed to expose kenyan engineers to advanced technologies and global best practices.

IEK and WFEO Advance Strategic Partnership for Engineering Capacity Building in Africa

Tuesday, 15th September, 2026

The Institution of Engineers of Kenya (IEK) has deepened its collaboration with the World Federation of Engineering Organizations (WFEO). IEK President Eng. Harrison Keter, accompanied by Council Member Eng. James Karori, held high-level discussions with Prof. Gong Ke, Chair of the WFEO Engineering Capacity Building for Africa Programme (ECBAP).

The meeting focused on scaling up relevant capacity-building initiatives for Kenyan engineers. Central to the dialogue were strategies for enriching continuous professional development (CPD), integrating emerging technologies into local engineering practice, and directly aligning training frameworks with Africa's evolving infrastructure and economic development needs.

This recent engagement builds on the momentum of the highly successful "AI for Engineers" programme, which was jointly delivered in Nairobi through the IEK-WFEO partnership.

By expanding on this foundation, IEK reinforces its commitment to establishing global partnerships that offer practical opportunities, enhance technical competencies, and position Kenyan engineering professionals for opportunities at both regional and global arena.

Eng. Erick Ohaga Clinches FAEO President-Elect Seat with Landslide Win of 83%

Friday, 18th September, 2026

Eng. Erick Ohaga won with a landslide the seat for President-Elect of the Federation of African Engineering Organisations (FAEO) with 83% of the vote. He was elected on the sidelines of the 12th UNESCO Africa Engineering Week and the 10th African Engineering Conference, held in Dar es Salaam, Tanzania from 13th to 17th September.

The mandate of FAEO is to serve as the overall leader and unified voice of the engineering profession in Africa, applying engineering and technology for the benefit of humanity and the sustainable development of the continent.

Representing over 1,500,000 engineering professionals across five regional blocks, FAEO acts as a critical link between African engineers and international bodies like the World Federation of Engineering Organisations (WFEO) and the African Union (AU).

Eng. Ohaga is an electrical engineer and currently the Director of Kenya's Nuclear Infrastructure Development at the Nuclear Power and Energy Agency (NuPEA). He previously served as President of The Institution of Engineers of Kenya (IEK) (2022 - 2024).

Industrial Visits: Preparations for the 33rd IEK International Convention Gain Momentum

Saturday, 19th September, 2026

Over the weekend, IEK Honorary Secretary Eng. Grace Kagundu recently held a strategic consultative meeting with the IEK Coast Branch leadership team, led by Branch Chair Eng. Catherine Karue, alongside Eng. Dorcas Mutheu and Eng. Christine Ndolo.

The discussions focused on fine-tuning logistical operations, technical programming, and delegate engagement to deliver an exceptional convention.

Beyond high level conference presentations and panel sessions, delegates will have the unique opportunity to participate in immersive industrial site visits across the coastal region.

These excursions are designed to offer engineers a firsthand look at landmark infrastructure and innovations.

Industrial Visits: Preparations for the 33rd IEK International Convention Gain Momentum

Saturday, 19th September, 2026

Potential Excursion Sites Include:

- Kenya Ports Authority (KPA): Maritime logistics and port infrastructure development.
- Mwache Dam Project: Large-scale water resource management and civil engineering (pictured above).
- KenGen's Kipevu I & Kipevu III Power Plants: Thermal power generation and grid reliability innovations.

From technical exposure and knowledge exchange to strategic networking, the 33rd IEK International Convention promises to be a defining gathering for engineers, industry leaders, and policy makers shaping the region's built environment.

IEK Coast Branch Mentors Engineering Students at Technical University of Mombasa

Friday, 18th September, 2026

The IEK Coast Branch held a career talk session at Technical University of Mombasa (TUM) on 18th September 2026 starting at 2:00 PM, aimed at supporting Civil Engineering students through industry exposure, career guidance, and professional development.

The session built on the University's engagement goal of exposing students to industry practitioners and current engineering trends, while fostering opportunities for future career paths in the engineering sector.

Key Highlights:

- Career guidance for Civil Engineering students on industry expectations and professional practice.
- Proposal ideas shared to support student growth and pathways into the profession
- Focus on strengthening IEK's presence among students undertaking accredited Engineering Programs through meaningful partnerships and membership recruitment

The mentorship session included: Eng. Catherine Karue - Chair, Eng. Benard Bonyi - Vice Chair, Eng. Hassan Mwandaro - Hon. Secretary, Eng. Vincent Ahono-KENHA Coast Region, and Dr. Esther Njoki-Civil Engineering.

IEK and ACEK Future Leaders Partner to Empower Engineering Students at TUK Mentorship Session

Friday, 18th September, 2026

Engineering students at the Technical University of Kenya (TUK) benefited from an impactful mentorship session held on Friday, 18th September, 2026. Centered on the theme “Engineering the Future: Inspiring Students to Lead, Innovate and Transform Society,” the event brought together aspiring student engineers and seasoned industry professionals for grounded, practical discussions on career progression and industry readiness.

Future Leaders from the Institution of Engineers of Kenya (IEK) joined forces with Future Leaders from the Association of Consulting Engineers of Kenya (ACEK) to facilitate the session. Clifford Nyambedha represented IEK Future Leaders during the session, leading key discussions and delivering actionable insights alongside fellow young leaders.

The presentations focused on navigating technical specializations, mapping long-term career pathways, and capitalizing on emerging opportunities within Kenya’s rapidly evolving engineering landscape.

The programme concluded with an energetic, interactive Q&A session. Students engaged directly with representatives from both IEK and ACEK, seeking guidance on transitioning from academia to industry, developing key professional competencies, and positioning themselves as future leaders in the sector.

THE ENGINEER'S CORNER

Kigen Kiprotich Leonard

Graduate Mechanical Engineer and Publishing Officer, IEK

1. TO START US OFF, TELL US A LITTLE ABOUT YOURSELF AND WHAT INSPIRED YOU TO PURSUE ENGINEERING

My interest in engineering began long before I entered university. While in high school, I had the opportunity to participate in an industrial visit to the Tenwek Hydroelectric Plant, located at Waterfall on the edge of the Tenwek Hospital compound.

That visit gave me my first meaningful glimpse of how engineering principles are transformed into practical systems that generate energy and support essential services. Seeing the hydroelectric plant and learning about how it operated sparked a curiosity in me about energy, machines and how technical systems work.

2. WHAT ENGINEERING DISCIPLINE DID YOU PURSUE, AND WHAT DREW YOU TO THAT PARTICULAR FIELD?

I pursued a Bachelor of Engineering (B.Eng.) in Mechanical Engineering, with a specialization in Plant and Industrial Energy Engineering.

My choice of this field was driven by my longstanding interest in energy systems, machinery and the practical application of engineering principles to solve real-world problems.

3. WHAT HAS BEEN THE BIGGEST LESSON YOU HAVE LEARNED SINCE BEGINNING YOUR ENGINEERING CAREER?

One of the biggest lessons I have learned is that engineering is not only about what you learn in the classroom; it is about applying that knowledge to solve real problems and continuing to learn throughout your career. My experiences have taken me from engineering training and practical exposure in mechanical systems to technical publications and professional engineering work. Each environment has taught me something different.

4. YOU CURRENTLY SERVE AS A PUBLICATIONS OFFICER AT IEK. HOW DOES YOUR ENGINEERING BACKGROUND INFLUENCE THE WORK YOU DO IN PUBLICATIONS AND COMMUNICATIONS?

My engineering background has been very useful because much of the content I handle is technical in nature. As a Publication Officer at IEK, I work with engineering articles, technical information, professional contributions and scientific material. My engineering training helps me understand technical concepts, identify areas that require clarification and ensure that information is communicated accurately and in a way that can be understood by the intended audience.

THE ENGINEER'S CORNER

Kigen Kiprotich Leonard

Graduate Mechanical Engineer and Publishing Officer, IEK

5. WHAT DOES A TYPICAL DAY LOOK LIKE FOR YOU IN YOUR ROLE AT IEK?

There is rarely a completely predictable day because publication work involves coordinating several activities and people. A typical day may involve reviewing and editing articles, communicating with authors and contributors, following up on submissions, coordinating technical or editorial reviews, proofreading content and working with designers on publication layouts.

6. WHAT HAVE YOU LEARNED ABOUT THE ENGINEERING PROFESSION THROUGH YOUR WORK AT IEK?

Working at IEK has shown me that engineering is much broader than the individual technical disciplines we study at university. It is a profession that contributes to infrastructure, manufacturing, energy, agriculture, technology, environmental sustainability and many other areas of national development.

7. WHAT DO YOU THINK ARE SOME OF THE BIGGEST CHALLENGES FACING YOUNG AND GRADUATE ENGINEERS IN KENYA TODAY?

One of the major challenges is the gap between academic preparation and opportunities for practical workplace experience. Many young engineers graduate with a strong theoretical foundation but find it difficult to secure opportunities where they can develop practical competencies and gain the experience required for professional progression.

8. WHAT SKILLS, BEYOND TECHNICAL ENGINEERING KNOWLEDGE, DO YOU BELIEVE YOUNG ENGINEERS NEED TO DEVELOP TO SUCCEED IN TODAY'S WORKPLACE?

Communication is one of the most important. An engineer may have excellent technical knowledge, but they must be able to explain a problem, present a solution, prepare a report and communicate with colleagues, clients and other stakeholders.

9. HOW IMPORTANT IS PROFESSIONAL DEVELOPMENT AND CONTINUOUS LEARNING FOR ENGINEERS, PARTICULARLY THOSE AT THE EARLY STAGES OF THEIR CAREERS?

It is extremely important. Engineering is a profession that continues to evolve, and graduating from university is only the beginning of the learning journey.

10. WHAT ADVICE WOULD YOU GIVE TO ENGINEERING STUDENTS AND GRADUATE ENGINEERS WHO ARE TRYING TO BUILD MEANINGFUL CAREERS IN THE PROFESSION?

My advice would be to be patient with the process, but remain proactive. Do not measure your progress only by the job title you currently hold. Every experience can contribute something to your professional development if you approach it with the right attitude.

11. LOOKING AHEAD, WHAT ARE YOUR ASPIRATIONS AS AN ENGINEER, AND WHAT IMPACT WOULD YOU LIKE TO MAKE THROUGH YOUR CAREER?

My long-term aspiration is to build a strong career in Plant and Energy Engineering, particularly in areas related to industrial energy efficiency, renewable energy, thermal and fluid systems, steam engineering, boilers, HVAC and sustainable energy technologies.

IMPORTANT UPDATES

REWARD MECHANISM FOR MEMBERS SUPPORTING RESOURCE MOBILIZATION

Each mobilized resource is tied to a specific event, and members may choose either a delegate fee waiver or a 5% commission.

AMOUNT MOBILIZED (KES.)	DELEGATE FEE WAIVER
100,000 - 249,999	25% waiver
250,000 - 499,999	50% waiver
500,000 - 999,999	75% waiver
1,000,000 and above	100% waiver

Integrity: Members will not be allowed to mobilize funds from their current employers or organizations where they work, particularly if these are regular or existing IEK partners, to avoid conflicts of interest.

Existing Partners: Contributions from existing or regular IEK partners will be excluded from the incentive scheme. This is intended to motivate members to pursue new partnerships and grow IEK's funding base.

Terms and Conditions, including applicable taxes, apply.

Be visible, grow your Brand **Advertise with Us!**

The Engineering in Kenya Magazine is published by the Institution of Engineers of Kenya (IEK). The magazine has a wide audience amongst Engineering professionals and beyond, including stakeholders and policy makers both in public and private corporate entities.

Advertising with us will bring you to the attention of these stakeholders and give you the opportunity to grow your market. Our print run is 3,000 hardcopies and over 229,000 in digital circulation, bimonthly.

Get noticed in our next edition. Reach out to the IEK secretariat on 020 2729326; 020 2716922 or via email to: editor@iekenya.org

Yours faithfully,
Eng. Grace Muthoni Kagundu
Honorary Secretary
The Institution of Engineers of Kenya
