In this Edition...

2. IEK Strengthens Collaboration with KenGen
3. IEK Explores Partnership with Imexolutions Limited
4. IEK and ACTOM Kenya Expand Areas of Collaboration
5. IEK Strengthens Strategic Partnership with Athi Water Works Development Agency
6. IEK Engages Egerton University to Enhance Engineering Education and Industry Linkages
7. IEK and Nakuru County Government Forge Closer Ties
8. Engineers' Corner - Clement Rono - Graduate Mechanical Engineer and Publicity Intern, IEK Secretariat

Dear Member,

The IEK Weekly Newsletter covers recent IEK events and upcoming ones, activities by the various committees, and any upcoming developments that affect Engineers and the Built Environment. This newsletter is a roundup of activities in the 4th Week of September 2026 (IEK/NL/204).

IEK Strengthens Collaboration with KenGen

Monday, 21st September, 2026

The Institution of Engineers of Kenya (IEK) Council, led by President Eng. Harrison Keter, paid a courtesy call to KenGen PLC at Stima Plaza as part of efforts to strengthen collaboration between the engineering profession and industry.

The IEK delegation included 1st Vice President Eng. Howard Mmayi, Honorary Secretary Eng. Grace Kagundu, and Council Members Eng. Desmond Barongo, Eng. Nashon Tambo, Eng. James Karori and Eng. Abass Hussein. The delegation was received by Eng. Julius Odumbe, General Manager, Operations at KenGen Plc.

The discussions explored areas of mutual interest, including, research and innovation, professional development, mentorship for graduate engineers, student attachments and industry-academia collaboration. The engagement also covered renewable energy, knowledge transfer and opportunities for industrial visits, among other areas.

The engagement reaffirmed the shared commitment of IEK and KenGen in advancing engineering excellence, fostering knowledge exchange and strengthening Kenya's engineering ecosystem in the energy sector.

IEK Explores Partnership with Imexolutions Limited

Thursday, 24th September, 2026

The Institution of Engineers of Kenya (IEK) led by the President, Eng. Harrison Keter, and Council Member Eng. Dr. Damaris Oyaro, paid a courtesy call to Imexolutions Limited as part of efforts to strengthen collaboration between IEK and the private sector.

The IEK delegation met with Imexolutions Limited Managing Director, Mr. Shinu Vattathara, to discuss areas of strategic collaboration and opportunities to support the development of local engineering capacity in the energy sector. Imexolutions is a manufacturing and distribution company for electrical and power equipment within Eastern, Central and Southern Africa.

The discussions focused on capacity building for local engineers and opportunities to promote value addition in manufacturing, with an emphasis on supporting local industrial growth and innovation. The engagement also explored the possibility of establishing a Memorandum of Understanding (MoU) to create structured internship opportunities for graduate engineers.

The upcoming 33rd IEK International Convention was also discussed as an opportunity to foster deeper collaboration between IEK and Imexolutions.

The engagement highlighted the importance of partnerships between IEK and private sector players in creating opportunities for engineers to gain practical exposure, build their professional capabilities and contribute to the growth of Kenya's engineering sector.

The discussions also centred on the possibility of establishing a Memorandum of Understanding (MoU) to formalise further areas of collaboration. The President extended an invitation to ACTOM Kenya to participate in the upcoming 33rd IEK International Convention. The engagement forms part of IEK's efforts to strengthen partnerships with industry players and create opportunities for knowledge transfer, practical exposure and innovation for members.

IEK Strengthens Strategic Partnership with Athi Water Works Development Agency

Friday, 25th September, 2026

The Institution of Engineers of Kenya (IEK) strengthened its engagement with the water sector following a courtesy visit by an IEK delegation to the Athi Water Works Development Agency (AWWDA) headquarters in Nairobi.

The delegation was led by Honorary Secretary Eng. Grace Muthoni Kagondou accompanied by Council Members Eng. Dr. Damaris Oyaro and Eng. Nashon Tambo. They were received by AWWDA Chief Executive Officer Eng. Joseph Kamau and Deputy Director, Water Works Infrastructure Development, Eng. Kiprono Dominic Rop.

The discussions focused on opportunities for collaboration in specialised capacity building for engineering professionals in the water sector, as well as industrial visits to innovative projects being undertaken by AWWDA. The two institutions also explored opportunities to expand internship and mentorship programmes for engineering graduates.

Research partnerships through industry-academia linkages were discussed as a means of promoting research on existing challenges relevant to the water sector. Participation in the upcoming 33rd IEK International Convention was also discussed as part of the broader engagement between IEK and AWWDA.

IEK Engages Egerton University to Enhance Engineering Education and Industry Linkages

Tuesday, 22nd September, 2026

The Institution of Engineers of Kenya (IEK), led by President Eng. Harrison Keter, visited Egerton University for an engagement focused on supporting the development of future engineers and strengthening collaboration between academia and industry. The IEK delegation also included Council Member Eng. Yvonne Robert, and South Rift Branch members Eng. John K. Karanja, Eng. Edith Chebet, Eng. Dr. Kennedy Okuku and Eng. Collins Changoale.

The visit began with a mentorship session for engineering students, followed by a courtesy meeting with the Acting Vice Chancellor, Prof. George Mungiria Muthaa, Registrar of Academic Affairs Prof. Mwanarusi Saidi and the Dean of the Faculty of Engineering and Technology, Eng. Prof. Japheth Onyando.

The discussions also focused on Kenya's roadmap towards Washington Accord recognition, including alignment of curriculum delivery with the requirements for international recognition. The need for enhanced funding to support institutions in meeting global engineering education standards was also discussed. The engagement further explored opportunities for developing tripartite Memoranda of Understanding (MoUs) involving IEK, Egerton University and key industry players. Such partnerships are intended to support stronger linkages between academia and industry.

The engagement reinforced the need for collaboration among professional bodies, universities and industry in strengthening engineering education and profession.

IEK and Nakuru County Government Forge Closer Ties

Tuesday, 22nd September, 2026

The Institution of Engineers of Kenya (IEK) strengthened its engagement with the County Government of Nakuru through courtesy visits to the Department of Water, Energy, Environment, and Natural Resources and the Department of Climate Change and Infrastructure.

The IEK delegation, led by Eng. Yvonne Robert, engaged officials from both departments to explore opportunities for greater collaboration and professional development, while supporting the application of engineering standards in county projects.

The discussions with the Department of Water focused on strengthening collaboration in climate resilience, sustainable water management and energy infrastructure across Nakuru County.

On the other hand, the discussions with the Department of Infrastructure centred on enhancing cooperation with the county's infrastructure teams.

The engagements also covered capacity building, continuous professional development (CPD) and the importance of upholding engineering standards in county projects. As part of the discussions on professional development, the departments committed to sponsoring their engineers to attend and participate in the upcoming 33rd IEK International Convention.

THE ENGINEER'S CORNER

Clement Rono

Graduate Mechanical Engineer and Publicity Intern, IEK

1. TELL US A LITTLE ABOUT YOURSELF AND YOUR JOURNEY INTO MECHANICAL ENGINEERING. WHAT INSPIRED YOU TO PURSUE THE FIELD?

While I was in primary school, I had an opportunity to visit Toror Tea Factory in Kericho. Seeing the tea processing machinery and the way different systems worked together to process tea really caught my attention. My interest in mechanical engineering then developed from curiosity about how machines work.

2. AS A GRADUATE MECHANICAL ENGINEER, WHAT ASPECTS OF MECHANICAL ENGINEERING INTEREST YOU THE MOST, AND WHY?

I am particularly interested in energy, eMobility, maintenance and engineering systems. Energy interests me because of the transition towards cleaner technologies. My exposure to eMobility has also increased my interest in how engineering is transforming transportation.

3. YOU HAVE PREVIOUSLY CONTRIBUTED TO IEK MAGAZINES. HOW DID THAT EXPERIENCE COME ABOUT, AND WHAT DID YOU LEARN FROM INTERACTING WITH ENGINEERS THROUGH THOSE ASSIGNMENTS?

One of the biggest lessons I have learned is that engineering is not only about what you learn in the classroom; it is about applying that knowledge to solve real problems and continuing to learn throughout your career. My experiences have taken me from engineering training and practical exposure in mechanical systems to technical publications and professional engineering work. Each environment has taught me something different.

4. HOW DOES YOUR PREVIOUS EXPERIENCE WITH IEK PUBLICATIONS COMPLEMENT YOUR ROLE AT IEK SECRETARIAT?

My previous experience has given me a practical understanding of content development, editing, interviewing, research and working with engineering stakeholders. Those skills are directly relevant to publicity because effective publicity requires identifying the right information, presenting it clearly and communicating it to the appropriate audience.

Having already worked on EiK Magazine content also means I understand some of IEK's communication environment and the importance of maintaining professionalism and accuracy when communicating about engineers and engineering activities.

5. WHAT HAS YOUR EXPERIENCE BEEN LIKE SO FAR, ABOUT WORKING AT IEK?

Although I have only been at the Secretariat for a few days, the experience has already been very informative. What has stood out to me is the level of coordination involved in supporting the engineering profession. There are different activities, stakeholders and communication needs that have to come together effectively.

I have also appreciated the opportunity to interact with professionals who have extensive experience in engineering and professional practice.

Clement Rono

Graduate Mechanical Engineer and Publicity Intern, IEK

6. WHAT MOTIVATED YOU TO TAKE UP THE PUBLICITY INTERNSHIP, PARTICULARLY COMING FROM A MECHANICAL ENGINEERING BACKGROUND?

I took up the opportunity because I see communication as an important part of an engineer's professional development. My mechanical engineering background gives me technical knowledge, while my experience in writing, interviewing and content development has helped me develop communication skills. I wanted an opportunity where these two areas could complement each other.

7. HOW DO YOU THINK STRONG COMMUNICATION SKILLS CAN BENEFIT AN ENGINEER'S CAREER?

Communication is extremely important in engineering because engineers rarely work in isolation. An engineer may have excellent technical knowledge, but they must still be able to explain a design, prepare a report, present findings, communicate with clients, work with colleagues and engage stakeholders. Good communication also helps reduce misunderstandings and ensures that technical information is understood by people who may not have the same engineering background.

8. IS THERE A PARTICULAR ENGINEER, STORY, OR EXPERIENCE THAT HAS INFLUENCED HOW YOU VIEW THE ENGINEERING PROFESSION?

One of the things that has influenced me most is interacting with engineers from different areas and hearing about the projects and challenges they have encountered. Through interviews and article development, I have seen that engineering is much broader than what we encounter in university classrooms. Engineers are involved in energy, infrastructure, manufacturing, transport, technology, environmental solutions and many other areas.

9. WHAT DO YOU THINK ARE SOME OF THE BIGGEST OPPORTUNITIES AVAILABLE TO GRADUATE ENGINEERS IN KENYA TODAY?

I think there are opportunities in both traditional and emerging areas of engineering. For mechanical engineers, areas such as energy, manufacturing, transport, eMobility, maintenance, automation and sustainable technologies present opportunities for continued learning and professional development.

There are also opportunities beyond purely technical roles. Engineers can contribute through research, project management, technical communication, entrepreneurship and policy-related work.

10. MECHANICAL ENGINEERING CUTS ACROSS SECTORS SUCH AS MANUFACTURING, ENERGY, TRANSPORT AND TECHNOLOGY. WHICH OF THESE AREAS WOULD YOU PARTICULARLY LIKE TO EXPLORE IN YOUR CAREER?

I would particularly like to explore energy and eMobility, while remaining open to other areas of mechanical engineering. My interest in energy comes from its importance to development and the transition towards more sustainable technologies. eMobility also interests me because it brings together mechanical engineering, electrical systems, energy storage, transportation and emerging technology.

11. WHAT ADVICE WOULD YOU GIVE TO ENGINEERING STUDENTS AND OTHER GRADUATE ENGINEERS WHO ARE PREPARING TO MAKE THE TRANSITION FROM UNIVERSITY INTO THE PROFESSION?

My advice would be to remain curious, be willing to start small and keep learning. University gives you the technical foundation, but professional engineering requires much more. Graduates should seek practical exposure, develop communication and interpersonal skills, build professional networks and take advantage of opportunities to learn from experienced engineers.

IMPORTANT UPDATES

REWARD MECHANISM FOR MEMBERS SUPPORTING RESOURCE MOBILIZATION

Each mobilized resource is tied to a specific event, and members may choose either a delegate fee waiver or a 5% commission.

AMOUNT MOBILIZED (KES.)	DELEGATE FEE WAIVER
100,000 - 249,999	25% waiver
250,000 - 499,999	50% waiver
500,000 - 999,999	75% waiver
1,000,000 and above	100% waiver

Integrity: Members will not be allowed to mobilize funds from their current employers or organizations where they work, particularly if these are regular or existing IEK partners, to avoid conflicts of interest.

Existing Partners: Contributions from existing or regular IEK partners will be excluded from the incentive scheme. This is intended to motivate members to pursue new partnerships and grow IEK's funding base.

Terms and Conditions, including applicable taxes, apply.

IMPORTANT UPDATES

NEW BENEVOLENT FUND SCHEME TO BEGIN ON 1ST OF NOVEMBER 2026

The Institution of Engineers of Kenya (IEK) is in the process of onboarding a new partner for the Benevolent Fund Scheme for the 2026/27 period following the expiry of the contract of the current provider, Octagon on 31st October 2026 .

Members are encouraged to enroll in the new scheme, once it takes effect on 1st November 2026, to access the benefits and support provided under the programme. More information will be provided in due course.

The Benevolent Fund Scheme underscores IEK's commitment to members' financial and social welfare support.

IMPORTANT UPDATES

RENEWAL OF MHANDISI MEDICARE SCHEME FUND

We extend an invitation for you to renew your Mhandisi Medicare Scheme Fund.

The Medicare Registration Form can be accessed [here](#).

Please be advised that existing members should anticipate receiving a detailed SMS with pertinent information from AAR.

Your prompt attention to the renewal process ensures uninterrupted access to the comprehensive healthcare benefits provided by Mhandisi Medicare Scheme Fund.

Thank you for your continued trust and participation in our healthcare program

NEW MEMBERSHIP PORTAL

The new integrated IEK membership management system offers convenience, accessibility, and improved services for you our valued members. **Members are encouraged to update their details by clicking [here](#) to activate their portals and access services on the go.**

By activating your portal, you can among others access:

- Digital membership [application](#)
- Streamlined events registration
- Instant receipts and invoices
- Streamlined CPD tracking

Kindly take note that we are no longer accepting manual applications as we are 100% paperless.

IMPORTANT UPDATES

IEK RETIRED ENGINEERS' FEE REMISSION POLICY

The Institution of Engineers of Kenya (IEK) acknowledges the significant contributions of its members throughout their careers. Recognizing the transition into retirement, IEK has established a tailored fee remission structure for retired engineers.

Full Waiver of the Annual Subscription Fees For Members Aged **70+**

Be visible, grow your Brand **Advertise with Us!**

The Engineering in Kenya Magazine is published by the Institution of Engineers of Kenya (IEK). The magazine has a wide audience amongst Engineering professionals and beyond, including stakeholders and policy makers both in public and private corporate entities.

Advertising with us will bring you to the attention of these stakeholders and give you the opportunity to grow your market. Our print run is 3,000 hardcopies and over 229,000 in digital circulation, bimonthly.

Get noticed in our next edition. Reach out to the IEK secretariat on 020 2729326; 020 2716922 or via email to: editor@iekenya.org

Yours faithfully,
Eng. Grace Muthoni Kagundu
Honorary Secretary
The Institution of Engineers of Kenya
